MEMORANDUM FOR DEPARTMENT OF STATE:

ATTENTION: Mr. Samuel Klaus
Room 437

Subject: German Specialists and Members of their
Immediate Families Whose Entry into the
United States is Requested.

Reference: JCS 1363/13

1. Enclosed herewith is the first list of ten (10)
German or Austrian Scientists whose entry into the United
States is requested in accordance with reference. Together
with this list is included the basic personnel records and
the sponsoring agency's request and certification of each
individual concerned, giving names of members of families
for which entry is also requested.

2. The sponsoring agency's certification contains
information pertaining to the Scientists present location,
field in which outstanding, field in which desired in United
States, type of visa desired and certain other pertinent
information necessary for issuing visas.

3. Attention is invited to the fact that these Scientists
are now actually present in the United States under the protec-
tive custody of the Army Air Forces. They are men who are
outstanding and are considered top flight in their field and
have been under the surveillance of U. S. Military Authorities
for over six months. Insofar as can be ascertained by observation,
personal records and intelligence screening they are believed to
be clear of any objectionable features which might bar their
entry into the United States. Their entry is desired in the
interest of the National Defense and it is requested that their
entry be effected without requiring them to return to the
European Theater, if this can be accomplished under existing
Statutes.

4. J.I.O.A. is currently processing these records and has requested additional intelligence information from the U.S. Military Forces in Europe. When this additional information is received, it will be forwarded to the State Department.

5. These records are forwarded to the State Department without containing all of the complete information, which it is believed the State Department requires, in order to enable the State Department to begin processing and determining what complete information will be necessary to effect the successful entry of these Specialists into the United States. It is requested that the cases of none of these individuals be prejudiced for lack of information which is not forwarded at this time, due to the fact that it is either unavailable at present or for which the necessity has not been made known to this Agency.

6. It is requested that J.I.O.A. be advised as soon as possible of the action taken in the cases of these Specialists and that specific and detailed requirements of the State Department for effecting entry of German and Austrian Specialists into the United States be forwarded to this Agency in order that future requests for entry may be properly prepared prior to submission to the Department of State.
